Theoretical Computer Science
Logic, semantics and theory of programming

Volume 216, Numbers 1–2, 6 March 1999

Abstracted/Indexed in: ACM Computing Reviews, Compuscience, Computer Abstracts, Current Contents: Engineering, Technology & Applied Science, Engineering Index/Compendex, INSPEC Information Services, Mathematical Reviews, Zentralblatt für Mathematik

Contents

Tutorial

A. Cerone and A. Maggiolo-Schettini
Time-based expressivity of time Petri nets for system specification 1

Fundamental Studies

W. Ferreira and M. Hennessy
A behavioural theory of first-order CML 55

E. Zucca
From static to dynamic abstract data-types: an institution transformation 109

R. Giacobazzi and F. Ranzato
The reduced relative power operation on abstract domains 159

Contributions

C. Zhang, R.A. Olsson and K.N. Levitt
Formal verification of a programming logic for a distributed programming language 213

P. Degano and C. Priami
Non-interleaving semantics for mobile processes 237

F. Levi
A compositional μ-calculus proof system for statecharts processes 271

P. Burmeister, M. Monserrat, F. Rosselló and G. Valiente
Algebraic transformation of unary partial algebras II: Single-pushout approach 311

M. Schmidt-Schauß
Decidability of behavioural equivalence in unary PCF 363

K.R.M. Leino and R. Manohar
Joining specification statements 375

Note

M. Ying
A shorter proof to uniqueness of solutions of equations 395

Author index volume 216 399
